I am using the following query to order the table and export the results to an excel sheet. SELECT [prod_id], [prod_name], [prod_qty], [prod_price] [sub_total] FROM products PIVOT (SUM([prod_qty]) FOR [sub_total] IN ([120],[130],[200],[300])) order by [sub_total] The pivot table has four columns, the product id, product name, product quantity and product price. I want to order them so that the product name and the sub total are in alphabetical order, and then the product qty, and the product price. I also want to export the results to an excel sheet.
A: You can order the columns inside the PIVOT 82157476af
